Projects

07/2021 – 09/2021

Scribble Stadium
Backend Engineer
- Reconstructed the Schema by migrating data and creating new tables in the SQL database.
- Participated in weekly meetings with Stakeholders and third-party web development teams about the product vision.

04/2021 – 05/2021

Water My Plants ⧉
Backend Engineer
- Architected and managed SQL tables while ensuring efficiency in mass data storability and accessibility.
- Designed and developed a RESTful API with multiple endpoints for CRUD operations.
- Utilized Test-Driven Development by configuring unit tests with Jest and React Testing Library.

02/2021 – 03/2021

Secret Family Recipes ⧉
Frontend Engineer
- Developed React components for fulfilling every CRUD operation that allowed the user to create, read, update, and delete their recipes.
- Produced multiple visual elements by translating UX design wireframes into code using CSS, Styled Components, and JSX.

03/2021

Stockcop ⧉
Frontend Engineer
- Translated a Sketch design into code using React JSX and CSS.
- Met deadlines designated by the client and readjusted components fluently as the product vision changed.
- Deployed website (Stockcop.io) using Vercel.
